

9600 Half-Duplex Wireless Transceiver

Information subject to change without notice

Description

Transceiver module for 9600 bps half duplex RF wireless data connection (433.92 MHz band), suitable for master-slave systems (1 polling master - 255 slaves max. per system). Highly reliable packet data transfer (packet max. lenght 120 bytes), under control of hardware resident firmware, responsible to automatically include and check preamble, address, checksum. User will uniquely send only the equipment related data, ignoring all the RF data transfer, as it will be automatically handled in transparent mode. Slave modules can be connected also to PLC type units, driven by commands sent via RS232 protocol. This equipment satisfies CEPT SRD 1 EI family.

WIZ1 system is available in two different models :

- WIZ1-434-RS (RS232 protocol with -10/+10 V logic)
- WIZ1-434-RSB (RS232 protocol with -10/+10 V logic with box)
- WIZ1-434-D (RS232 protocol with 0/+5V TTL logic)
- WIZ1-434-DB (RS232 protocol with 0/+5V TTL logic with box)

WIZ1 system is supplied in open frame or in white coloured plastic box.

Technical Specification

CHARACTERISTICS		MIN	TYP	MAX	UNIT
V_s	Supply Voltage • Alimentazione	9		18	Vdc
I_s	Supply Current RX-TX • Corrente assorbita RX-TX	20		30	mA
P_o	RF Output Power • Potenza RF in uscita	5		10	mW
F_w	Working Frequency • Frequenza di lavoro		433.92		MHz
R_d	Data Rate Transmission • Velocità di trasmissione dati		9600		bit/s
T_{op}	Operating temperature range • Temperatura di lavoro	-20		+80	°C

Certification Tests from PRIMA RICERCA & SVILUPPO - 22020 Gaggino Faloppio (CO) Italy.

I report tecnici sono stati ottenuti dal laboratorio PRIMA RICERCA & SVILUPPO - 22020 Gaggino Faloppio (CO) Italia.
